WildFaces.ai
wildAI On-The-Move

November 2020

Highway Protection

Smart Traffic Solution

Successfully delivered for the Hong Kong SAR Government within 8 weeks with 100% accuracy and zero false alarm.

Our system was able to reduce traffic bottlenecks by alerting timely actions on pedestrians trespassing, illegal parking and left objects on highways.

Smart Facility Management

Personalized experience

Optimal energy management

Anti-contagion

Engage tenants with analytics

Flexible workspace with automations

Way-finder & Anonymous tracking

Secure, safe & seamless access

IoT operating system & centralized control

Wildfaces heralds the era of humanized, self-maintaining facilities capable of operating independently.

WildAI™

Patented WildAI on-the-move provides moving IoT devices e.g. drones, robots, wearable-cameras, with visual intelligence and analytics.

Wildfaces disrupts deep learning vision-AI by overcoming their constraints that often require massive data training & labelling exercise. Our technology is proven with many government agencies & industry clients helping them to automate their tedious & time-consuming processes using our AI in preventive maintenance & Smart Facility Management etc.
